

# TOP DOWN APPROACH

Add subtitle here

# Overview

- ▶ What is the Top-down approach?
- ▶ Steps to execute the Top-down approach
- ▶ How can we apply to Top-down approach in our life

# WHAT IS TOP-DOWN APPROACH

# What is top-down approach?

4

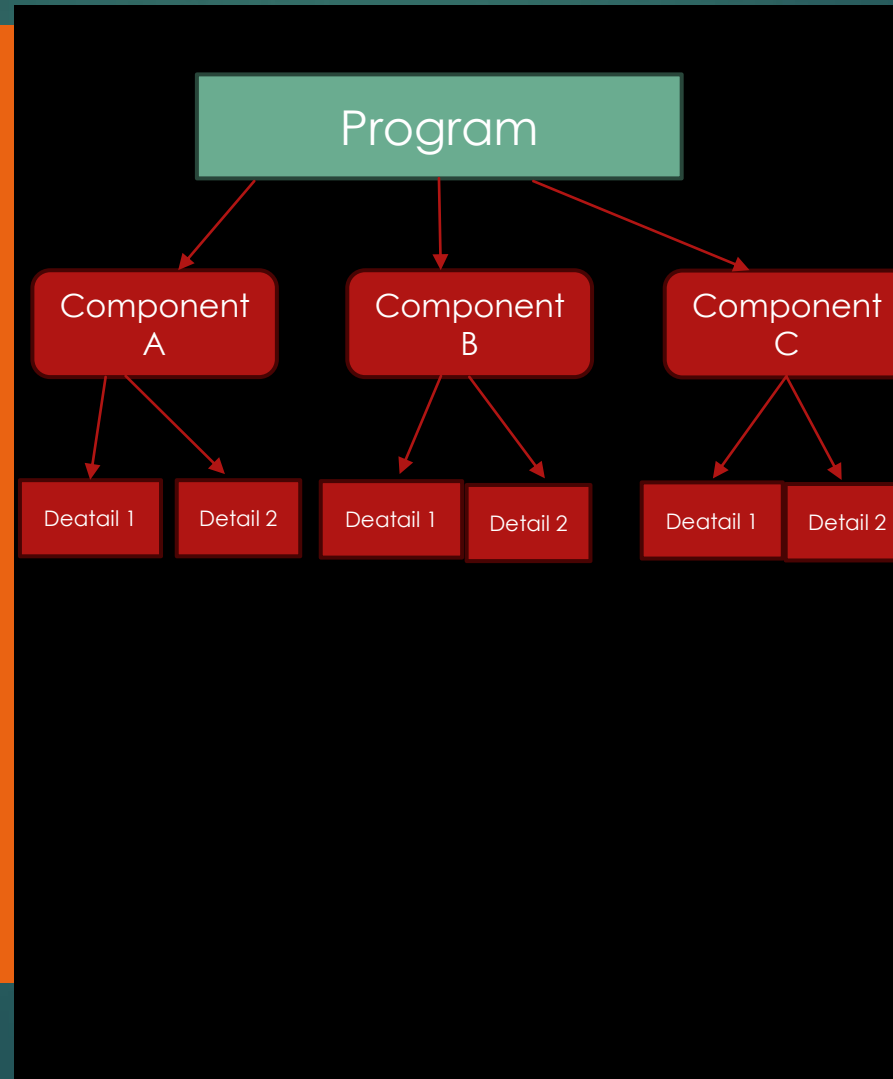

- ▶ It is a strategic method by which we will view the whole problem and then break down it into smaller, and more specific details
- ▶ For example:
  - ▶ In programming, we will focus on the overall structure of a program and then we will break it into smaller and more manageable components. It means we will the outline firsts and then refining each components later.

# Example:

5

- ▶ At first we will stretch out our program.
- ▶ After that we will break down it into more smaller components
- ▶ Next, we will define each component more specific until the whole system is completed.

# Advantages and disadvantages

6

## Advantages:

- Help us to understand the big picture of the problem, therefore we can see the goal more clearly.

- Help us to identify the prioritization of each tasks.

=>We can locate the resources more effectively.

- By break down the systems or projects into smaller components, we can manage them more easily and effectively.

## ▶ Disadvantages:

- ▶ We may ignore the specific details.

- ▶ Because we view the goal before starting implementation so if there are any changes, we have to start from the beginning again.

- ▶ It is also hard to adapting new requirements during the implementation stages.

HOW I APPLY IT IN REAL LIFE
